

Procedure: Blindfolded Cylinder Swap in IDLH Environment

1. Pre-Entry:
 - Conduct a risk assessment and team briefing.
 - Check all equipment, including SCBA and blindfolds.
 - Establish tactile landmarks for navigation.
2. Entry and Swap:
 - The Entry Team, wearing SCBA and blindfolds, uses tactile landmarks to locate the cylinder.
 - Disconnect the old cylinder by touch, then remove and replace it with the new one.
 - Ensure connections are secure and perform a leak check by feel.
3. Exit:
 - Follow tactile landmarks to exit, maintaining communication.
